June 2020

Greeting,

The Boys and Girls Club of East Scarborough is strongly supportive of the Learn at Home Kits, that have been established through the Parents Engaged in Education organization. These kits have been instrumental in encouraging and supporting parent engagement as it relates to education. Schools and community organization such as us were closed as of March 13<sup>th</sup> due to Covid – 19 and kits disturbed in the weeks following proved to be beneficial in continuing the children’s learning experiences at home.

Increased funding for this project will support and ensure that the children within the Boys & Girls Club of East Scarborough Community continues to receive the educational support needed while at home during the summer months. Feedback received thus far from the children are positive and inspiring “ I never knew that learning school stuff at home with my mom will be this fun” ( Grade 3 student). Parents are extremely grateful for the additional educational tools “ these resources are helping me to better understand my child's classroom assignments and homework”.

We would like to applaud the Parent Engaged in Education organization for their response and contribution to supporting families during Covid-19. The Boys & Girls Club of East Scarborough stands strongly behind the continuation of this project so that other organizations and neighbouring communities can benefit from the Learn at Home Kits.

Regards,

Trichelle Primo

Senior Manager Children & Early Teen Services
